

Christian Arroyo

Data Analyst | SQL | Reporting | Data Quality

(808) 699-8030 | arroyo.main@gmail.com | linkedin.com/in/christianmarroyo

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience using SQL, reporting, data validation, and database solutions to support business operations and decision-making. Experienced in analyzing operational data, improving reporting workflows, designing relational databases, and collaborating across business and technical teams. Strong foundation in SQL and Excel with developing Power BI and Python capabilities.

CORE STRENGTHS

Data Analysis • SQL • Reporting • Data Validation • Database Design

Data Quality • Process Improvement • Requirements Analysis • Automation • Stakeholder Collaboration

TECHNICAL TOOLKIT

SQL & Databases: SQL Server, SSMS, relational database design, joins, CTEs, aggregations, window functions

Reporting & Analytics: Excel, Power BI (developing proficiency), operational reporting, data validation

Programming & Automation: Python (pandas), PICK BASIC

Development & Documentation: Git, VS Code, technical documentation, CSV workflows

PROFESSIONAL EXPERIENCE

Data Analyst I | Linebarger Goggan Blair & Sampson, LLP | San Antonio, TX

Nov 2022 - Present

Data Analyst role supporting debt collection systems, databases, reporting, deployments, automation, and operational process improvement.

- Analyze operational and reporting data using SQL to identify patterns, anomalies, and issues that support business decisions
- Support recurring and ad hoc reporting requests for business stakeholders, including operational reporting and research-driven data requests
- Review and validate business data to improve reporting accuracy, data quality, and workflow consistency
- Automate recurring reporting and operational workflows, reducing manual effort and improving consistency
- Collaborate with DBAs, developers, and business stakeholders to troubleshoot issues, clarify requirements, and implement data and reporting solutions
- Manage application and configuration promotions across TEST and PROD environments, including 250+ formally tracked defect installations
- Document technical processes and mentor teammates on recurring reporting workflows to support knowledge sharing and operational continuity

Client Support Specialist | Linebarger Goggan Blair & Sampson, LLP | San Antonio, TX

Aug 2021 - Nov 2022

Supported data management, reporting, and system operations within the Columbia Ultimate (CUBS) platform.

- Supported daily business data operations within CUBS, maintaining accurate records and reliable reporting processes
- Performed data validation and quality checks to maintain the integrity of business-critical information
- Prepared operational reports and supported internal teams with data and reporting requests
- Partnered with technical teams to troubleshoot system and reporting issues

PROJECTS

Reusable Client Processing Database

SQL Server, SSMS, Git

- Designed and implemented a relational SQL Server database to support a new multi-step client processing workflow
- Structured reusable database components to support client, vendor, request, result, configuration, and notification workflows for future client onboarding
- Translated evolving business and technical requirements into tables, relationships, constraints, configuration data, and processing rules
- Collaborated with the developer and project manager through working sessions and written communication to clarify requirements, resolve implementation questions, and align the database design with the broader application workflow
- Created deployment and validation scripts, seeded configuration data, and validated the initial database implementation in a controlled DEV environment

Dashboard User Access Database

SQL Server, Python, Outlook Integration

- Designed a relational SQL Server database to manage dashboard users, access requests, client permissions, email logging, and request completion
- Created tables, relationships, and stored procedures supporting user creation, access requests, client assignment, access grants, and completion tracking
- Built Python components for database connectivity, request workflow processing, email generation, and Outlook integration

Operational Audit Workflow Automation

PICK BASIC, SQL Server, Excel

- Automated a manual quarterly audit reporting process, reducing preparation time from several hours to under 30 minutes per cycle
- Improved data consistency, validation, and audit traceability through repeatable reporting logic
- Produced structured Excel outputs that simplified review for non-technical stakeholders

EDUCATION

Bachelor of Science in Computer Science | Hawaii Pacific University, Honolulu, HI

2017
